

MPILO MANKAZANA

Junior Software Developer | Data & Business Analytics

074 762 3479 · 068 518 1724 · mpilomankazana601@gmail.com · linkedin.com/in/mpilomankazana · github.com/Mpilomankazana · Johannesburg, South Africa

PROFESSIONAL SUMMARY

Motivated and technically grounded Junior Software Developer completing an intensive Software Engineering diploma at WeThinkCode_ while simultaneously pursuing a BCom in Quantitative Management at UNISA. This rare combination bridges systems thinking with rigorous mathematical modeling, optimization, and data intelligence. Proficient in Python and Java across backend systems, OOP, networked applications, multi-threaded servers, relational databases, and CI/CD pipelines. Experienced in both greenfield and brownfield software development, including inheriting and improving legacy codebases. Demonstrated ability to deliver under pressure through hackathon participation, independent project development, and active community leadership at Google Developer Group Pretoria.

TECHNICAL SKILLS

Languages: Python (Advanced) · Java · JavaScript · HTML · CSS · SQL

Frameworks & Tools: Spring Boot · React · Maven · JUnit 5 · Docker · GitHub Actions (CI/CD) · Javalin

Databases: PostgreSQL · SQLite · JDBC · EoDSQL ORM · Relational Schema Design

Data & Analytics: Apache Kafka · Pandas · dbt · Airflow · Streamlit · Power BI (in progress)

Version Control & Git: Git · Trunk-Based Development · Feature Branching · Rebase Workflow · GitLab CI/CD · CodeScene

Software Development: Greenfield Development · Brownfield Development · OOP · TDD · Agile/Scrum · Code Review · Technical Documentation

Architecture: Multi-threaded Servers · Socket Programming · Layered Architecture · Separation of Concerns · REST/Web APIs · JSON Protocol

Blockchain: Solana · Rust / Anchor Framework · Smart Contract Development

Business: Financial Accounting · Business Management · Quantitative Methods · Economics · Commercial Law

Languages (Human): English (Professional) · Zulu · Xhosa · Sotho · Tswana

EDUCATION

National Diploma in Software Engineering | WeThinkCode_ | Oct 2025 - Feb 2027 (Expected)

NQF Level 6 · Final Year · Ongoing

- Modules: Programming Fundamentals (Python), Object-Oriented Programming (Java), Brownfield Software Development, web development, Data Engineering
- Greenfield projects: multi-user networked Robot Worlds game with sockets, multi-threading, JSON protocol, Docker, and GitHub Actions CI/CD
- Brownfield project: inherited and extended a production-grade Java Robot Worlds server across 4 iterations, applying CodeScene analysis, layered architecture, SQLite persistence with JDBC and EoDSQL ORM, and Web API development
- Applied trunk-based development and feature branching with daily rebase workflows across a team of 5
- Completed GenAI certification issued by WeThinkCode_ - February 2026

BCom Quantitative Management | University of South Africa (UNISA) | 2025 - Dec 2028 (Expected)

NQF Level 7 · 1st Year · Ongoing

- Modules: Information Systems, Programming, Databases, Financial Accounting, Business Management, Economics, Quantitative Methods, Commercial Law

Higher Certificate in Economics & Management Sciences | UNISA | 2025 - Completed

NQF Level 5 · 6 distinctions from 10 modules · Average above 74%

- Distinctions: Quantitative Methods (90%) · Business Management (87%) · Introduction to Economics (86%) · Basic Numeracy (79%) · Commercial Law (79%) · Sustainability (75%)

CERTIFICATIONS & TRAINING

Work Readiness Certificate Afrika Tikkun

2025

Generative AI GenAI Certificate WeThinkCode_

February 2026

Full Stack Software Developer Certificate FNB App Academy (enrolled)

Expected Dec 2026

VOLUNTEERING & COMMUNITY LEADERSHIP

Placement Facilitator | WeThinkCode_ / Oct 2025 - Present · Johannesburg

As a Placement Facilitator, I guide students through workplace readiness and internship placement. I coordinate workshops, mentor students on professional skills, and collaborate with the placement team to ensure students meet employer expectations. I also continue to develop my own work-readiness skills through training, practice, and peer coaching.

Key Responsibilities:

Facilitate workshops on CV writing, interview preparation, professionalism, and workplace ethics.

Guide students on presenting themselves professionally in tech and corporate environments.

Help peers understand workplace expectations and essential soft skills required by employers.

Collaborate with the student placement team to prepare students for host company interviews and assessments.

Enhance personal work-readiness skills through training, practice, and peer coaching.

Speakers Liaison | Event Coordinator / Google Developer Group (GDG) Pretoria / Jan 2026 - Present

As a speaker's Liaison at Google Developer Group Pretoria, I coordinate and support speakers for community tech events, ensuring smooth communication, scheduling, and event preparation. I help create an engaging experience for both speakers and attendees by managing logistics, sharing resources, and maintaining professional relationships within the developer community. Through this role, I contribute to building an inclusive environment where developers can learn, network, and grow together.
